The combination of Bruno innovative design and manufacturing expertise with the DDSL and Westac special build pedigree delivers outstanding customer choice.

For many years Bruno have produced reliable and robust diesel generators which have now become the first choice for the biggest names in rental hire fleets.

Innovative canopy and independent cooling system designs means lower fuel consumption and industry leading noise output levels (as low as 52dBa @ 7mtr).

Offering engine, alternator and control panel choices giving every customer an option to suit their individual needs.

DDSL/Westac

Acquired by Bruno over recent years these two companies have, over many years, gained a solid reputation for building bespoke diesel and gas powered generator sets which are now commissioned and installed around the world.
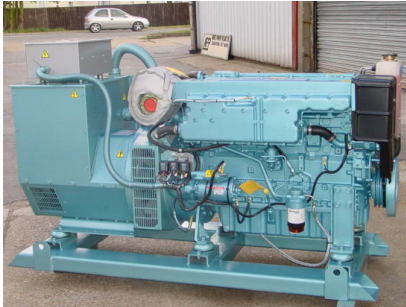

Customer support and service gives every customer confidence in their generator installation.

Maintenance contracts are available for all generators, including non-Bruno products.

BGG Lighting Towers

Metal halide, LED and Lithium Ion LED Hybrid.

A range of lighting towers which provide all users the perfect solution for their lighting requirements.

LED lights offer 40% more light than standard Metal Halide and use 60% less fuel.

Hybrid LED lights provide up to 10 hours of battery power (80% DoD) with 2.5 hours recharge and an autonomy of 60 days.
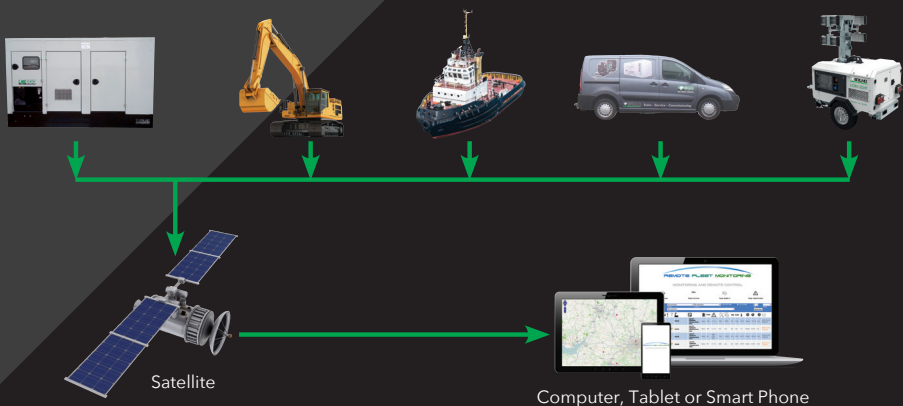

All lighting towers have: Galvanised canopies, fully hydraulic to 9 metre masts, Fit 10 to a 40' trailer, PTO and are fully bunded.
